

// PRACTICAL PROTOCOL FOR MEN

Eye**maxxing**

A do-this-now playbook for the eye region. Build contrast, add structure, dial up masculinity — one actionable step at a time.

Eyebrows

Target: low-set, full, thick and long, with a positive or neutral tilt.

GROOMING — DO FIRST

- › Groom properly before anything else — highest impact, lowest cost.
- › Comb to line up **Point A**, the inner start of the brow.
- › Set start, arch and tail consistently every time.

IF BROWS ARE SPARSE

- 1 **Build a base.** Minoxidil 2%, more effective with tretinoin (0.025–0.05%).
- 2 **Order:** tretinoin first, then minoxidil. Night-time only.
- 3 **Dermaroller** twice per week max.

⚠ SAFETY CHECK

Potent off-label topicals. Patch-test, introduce one at a time, apply at night only, and stop if irritation develops.
